Who owns, operates and manages energy storage facilities under the Clean Energy Package?

Strommarkttreffen 09.03.2018
1. Why put storage in the Package?
Theory vs. Technology
2. What is in the Package?
Storage in the Clean Energy Package – Highlights

Storage vs. Grid expansion

DSOs must set up network development plans. They must show how they procure:

- services from storage
- as a standardized product

to avoid grid expansion.

Art. 32 Electricity Market Directive.
DSOs must set up network development plans. They must show how they procure
• services from storage
• as a standardized product
to avoid grid expansion.
Art. 32 Electricity Market Directive.

Active consumers owning a storage facility are not subject to additional taxes, surcharges, or fees for the electricity stored in the storage facility.
They shall not be subject to disproportionately burdensome procedures.
Art. 15 Electricity Market Directive.

Active Consumers
Active consumers owning a storage facility are not subject to additional taxes, surcharges, or fees for the electricity stored in the storage facility.
They shall not be subject to disproportionately burdensome procedures.
Art. 15 Electricity Market Directive.

Access all Markets
All generation, storage and demand resources shall participate on equal footing in the market.
This includes balancing markets.
Art. 3 & Art. 5 Electricity Market Regulation
3. Who is going to own Storage?
Averch-Johnson in Action – Who owns storage?

Commission

Distribution system operators shall not be allowed to own, develop, manage or operate energy storage facilities.
