Ziele des dritten Nordseegipfels

Umsetzung und Zusammenarbeit bei nationalen und gemeinsamen Ambitionen für die Nordsee

Regulatorischer Handlungsrahmen

Vertiefung und Ausweitung der bi- und multilateralen Zusammenarbeit

Aufgaben und Ergebnisse

Declaration of
HoSG

Declaration of
Energy
Ministers

Bi- and
Multilateral
Agreements

Industry
Agreements

Die Nordsee zum grünen Kraftwerk machen

Kooperation

Durch grenzüberschreitende
Planung und Finanzierung

Kooperationsziele

Grenzüberschr. Netzplanung und MSP

Offshore-Wind Financing Facility

Voraussetzungen

Als unterstützender Rahmen

Investitionssicherheit für Offshore-Windparks

Beschleunigte
Genehmigung

Faire Kosten-
Nutzen-Teilung

Integration von Strom- und H2-Infrastruktur

Konstruktion

Für einen schnellen Zubau

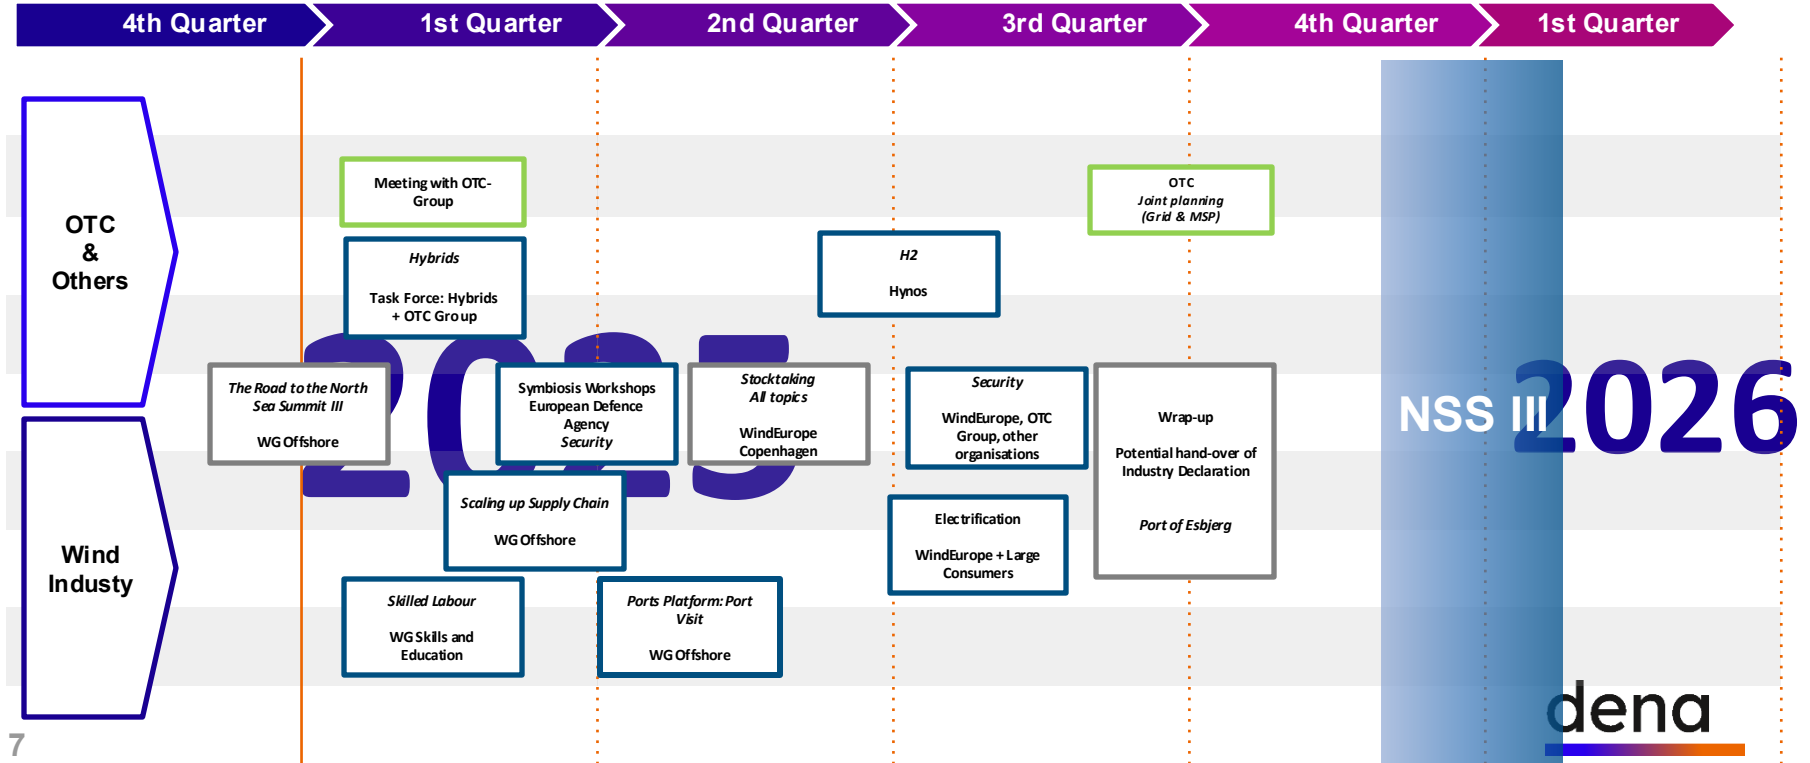

Fit for 300 GW durch Ausbau der Kapazitäten
von Produktion, Häfen und Logistik

Sicherheit der
Infrastruktur

Verfügbarkeit von
Fachkräften

Stakeholder Einbindung

From National to Regional: Europäische Offshore-Kooperation im Nordseeraum

Highlights aus dem bisherigen Prozess

North Seas Energy Cooperation

NSEC Mandate to support OTC cooperation

Emphasizing the commitment of the North Seas Energy Cooperation (NSEC) to unlock the offshore renewable potential in the North Sea, and the role of a regional method offshore grid to achieve ambitions;

Recognizing the work of the Offshore TSO Collaboration (OTC), its added value to stimulate regional approaches and highlight that it can complement existing European and National Frameworks, such as the Offshore Network Development Plan (ONDP) and the Ten Year Network Development Plan (TYNDP) processes;

Emphasizing the well-earned interface between NSEC and OTC for strategic and coordination, acknowledging the role between the UK and NSEC and the evaluation of the UK option operator to the OTC;

NSEC:

Acknowledges and welcomes the work done by the OTC in their joint grid map study and its regional planning perspective as presented in Copenhagen on 10 April 2025;

Considers the grid map as a key step towards regional integration and cooperation in the North Sea Basin;

Emphasizes the need to further increase the volume of cross-border cooperation projects to unlock the full wind energy potential of the North Sea in a cost-optimized way;

Looks forward to receiving an update on the proposed grid map of processing projects towards the NSEC, envisioned in October 2025 and the North Sea Summit II at the end of 2025;

Encourages the respective project promoters to submit the projects as identified as promising in the joint grid map for consideration in the upcoming TYNDP 2026 edition;

For this purpose, NSEC:

Will support the development of the project set by the OTC through continued regular exchange among the respective administrative, guidance to OTC and regular engagements;

Will, for this purpose, continue engaging with representatives of OTC, including through the appropriate Support Groups and Coordinators in order to continue enabling the direct exchange between NSEC and OTC on the grid map study as well as on cost sharing and financing of projects (H);

NSEC calls on the OTC members to:

Continue their joint analysis on promising project sets for the North Sea for future planning cycles by October 2025 as next intermediate milestone for further continuation in the years to come;

Present an updated report including an updated grid map and insights on cost sharing and financing frameworks ahead of the NSEC envisioned in October 2025 as well as the 2025 North Sea Summit;

Handled over in Copenhagen on 10 April 2025

Press releases

Newsroom Press releases Europe's wind industry proposes New Offshore Wind Deal for Europe

10 April 2025

Europe's wind industry proposes New Offshore Wind Deal for Europe

Today Europe's wind industry proposed a new deal to speed up and de-risk the build-out of homegrown and competitive offshore wind energy. The proposal calls on European Governments to auction at least 100 GW of new offshore wind over 2031-2040. Crucially these auctions should use two-sided contracts for difference. The offshore build-out should be more coordinated among European countries and distributed more evenly over time. The visibility on volume and revenues from a stable pipeline of Contract-for-Difference auctions will help reduce costs and ensure offshore wind plays its role in delivering Europe's energy objectives. The industry commits to reducing the cost of offshore wind by 30% by 2040.
